

## ERA-CAPS 2. Call

### National Annex: RCN - Norway

**Partner:** The Research Council of Norway (RCN)

**Notice:** RCN participates through the national program Biotechnology for Innovation (BIOTEK2021) in all call topics. RCN does not require a national application, but it should be clear from the common application what role the Norwegian partners would have and the size of their budget. BIOTEK2021 has allocated up to a total of 11 Million NOK (1,3 Million Euro) for Norwegian participation in the second ERA-CAPS call. No fixed limits are set on the size of the projects, but it is assumed that 2-3 Norwegian research groups may receive funding.

**Eligibility and national funding modalities:** Universities and research organisations may receive funding according to the rules of Researcher projects (Forskerprosjekt) of RCN. In these cases up to 100% of total eligible costs may be funded. Companies and commercial entities may receive funding according to the rules of Innovation Project for the Industrial Sector (Innovasjonsprosjekter i næringslivet) of RCN. In these cases up to 50% of total eligible costs may be funded. Only projects that are according to the aims of BIOTEK2021 will be funded. Please see the program work plan [here](#).

#### **Additional national regulations and guidelines:**

Please contact the national contact person in case of further questions.

#### **National Call Coordination (NCC):**
