

National Annex: Hungary - MTA-OTKA

Partner: Centre for Agricultural Research of the Hungarian Academy of Sciences

Notice:

Applicants seeking Hungarian financial support for their participation in an ERA-CAPS project resulted from the second ERA-CAPS call have to proceed according to the following procedure:

1. Submit their proposal as a part of a joint application of an international consortium built up according to the rules of the second ERA-CAPS call, to be published at www.eracaps.org on 14th January 2014.
2. Submit their proposal to the Hungarian Scientific Research Fund (OTKA), as well, to be evaluated by OTKA as an 'NN' type application. The submission and evaluation procedure of OTKA-NN proposals is described here:

<http://otka.hu/en/call-for-proposals/international-cooperation>

When submitting the Hungarian parts of the ERA-CAPS joint applications as 'NN' type proposals to OTKA, the applicants from Hungary have to highlight that these proposals are parts of ERA-CAPS applications and the international partners are those who joined the respective ERA-CAPS consortium. The ***Declaration on International Cooperation***, to be found at the link provided above, has to be completed and signed by the national leaders of the ERA-CAPS consortium, and submitted as a component of the OTKA-NN application. All the other rules regarding OTKA-NN applications have to be strictly followed, as well.

Hungarian financial support will be provided by OTKA if the Hungarian proposal is supported as an OTKA-NN application and if the joint application of the ERA-CAPS consortium which includes the respective Hungarian partner is supported as a whole.

Applicants from Hungary are strongly advised to contact the national ERA-CAPS representative before starting to prepare a proposal for this grant.
